- Contours (5m interval)

Compilation Notes

Thematic information compiled from field checks undertaken by **Living Streets Aotearoa Inc.** during November 2008 and from digital data held by Wellington City Council.

Topographical information derived from Wellington City Council data, January 2009.

Map Projection

This map is drawn on the New Zealand Transverse Mercator 2000 projection. The grid is the New Zealand Transverse Mercator 2000 grid, showing coordinates in metres in terms of the New Zealand Geodetic Datum 2000 (NZGD2000) based on the Geodetic Reference System 1980 (GRS80) ellipsoid.

Global Positioning System (GPS) users can use the World Geodetic System 1984 (WGS84) reference frame for navigation.

Living Streets Aotearoa Inc

Living Streets Aotearoa is the walking advocacy organisation for New Zealand. We support the rights of pedestrians, promote the benefits of walking and work towards walking-friendly communities.

Our vision is ***More people walking more often and enjoying public places - young and old, fast and slow, walking, sitting and standing, commuting, shopping, between appointments, for exercise, for leisure and for pleasure.***

Walking is the **first mode of transport** - all the rest are alternatives.

This map has been produced by Living Streets Aotearoa Inc on behalf of Victoria University of Wellington to help people walk between the University campuses.

For more information please check out our website: www.livingstreets.org.nz

The more people walk, the safer our streets!
