

# Pedestrian Crossing Times and Equity on the Road

A case study from Christchurch

Meg Christie, Health Promoter,  
Community and Public Health  
CDHB

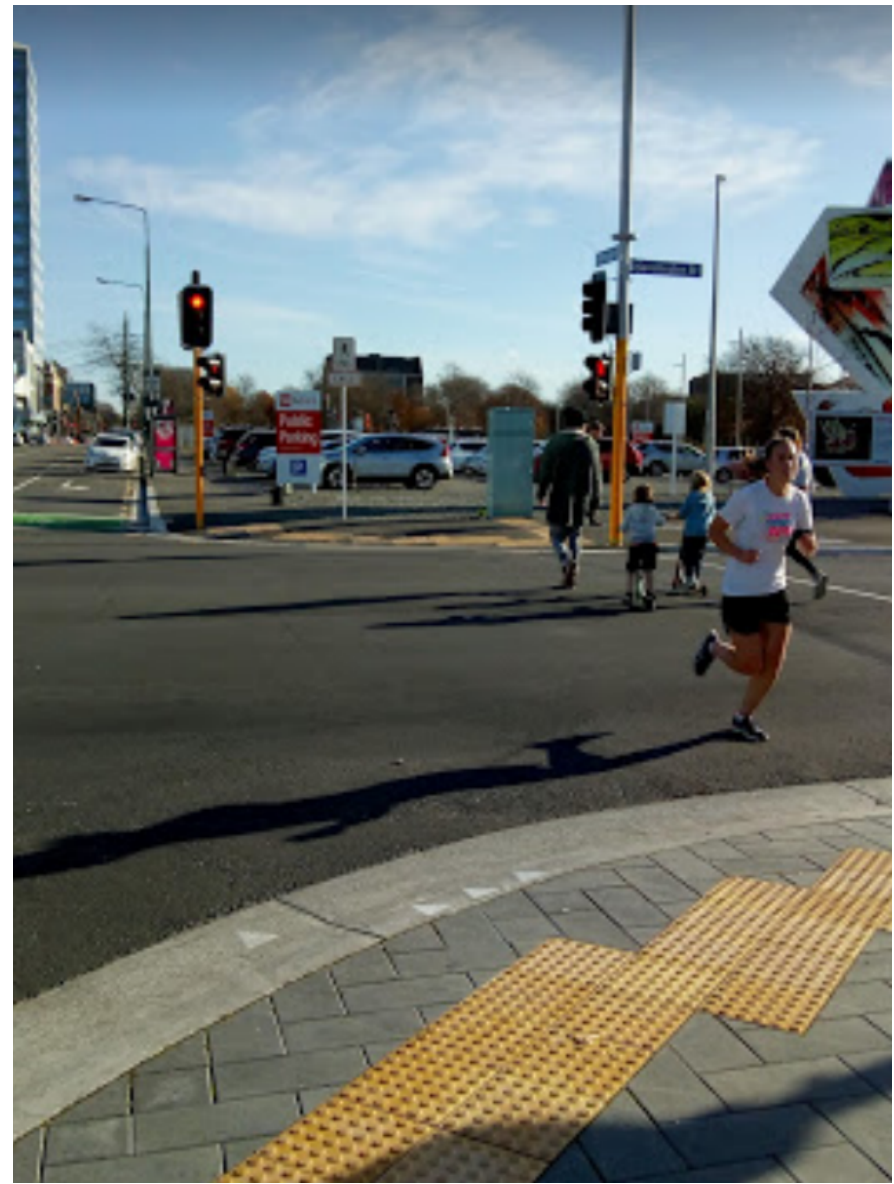

# Method

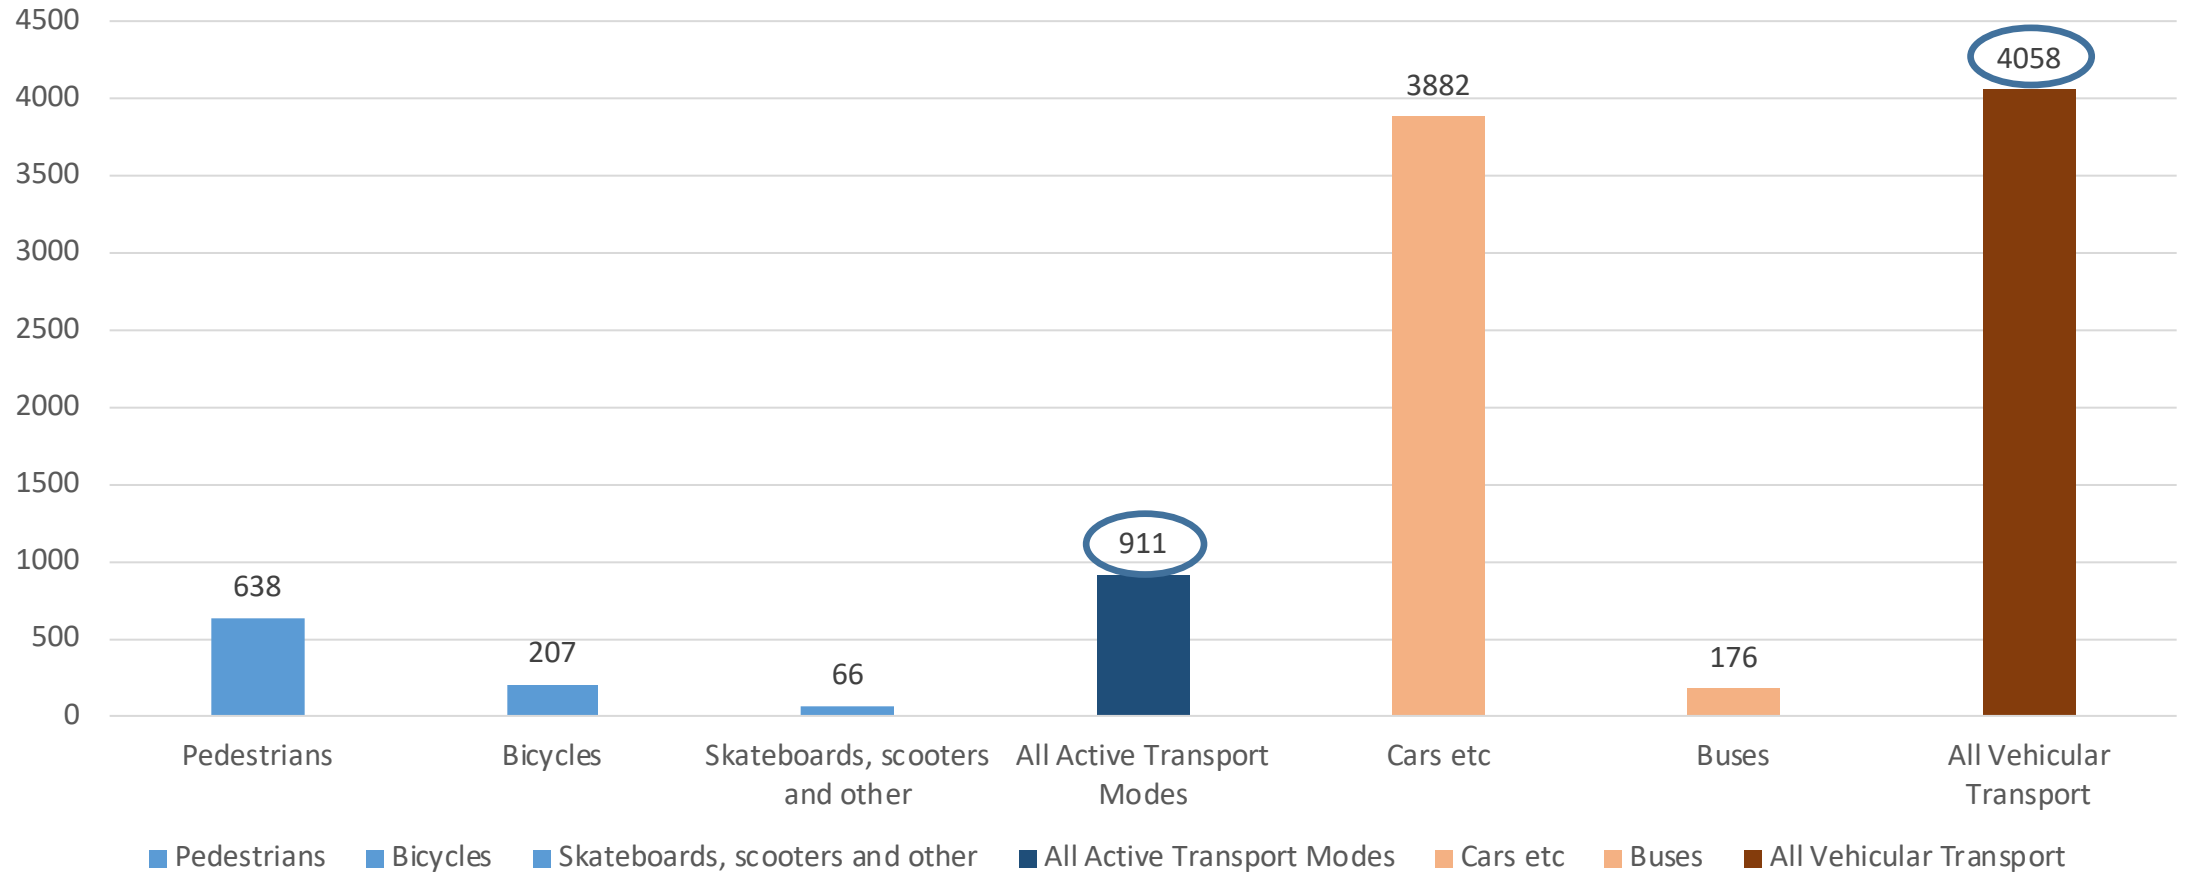

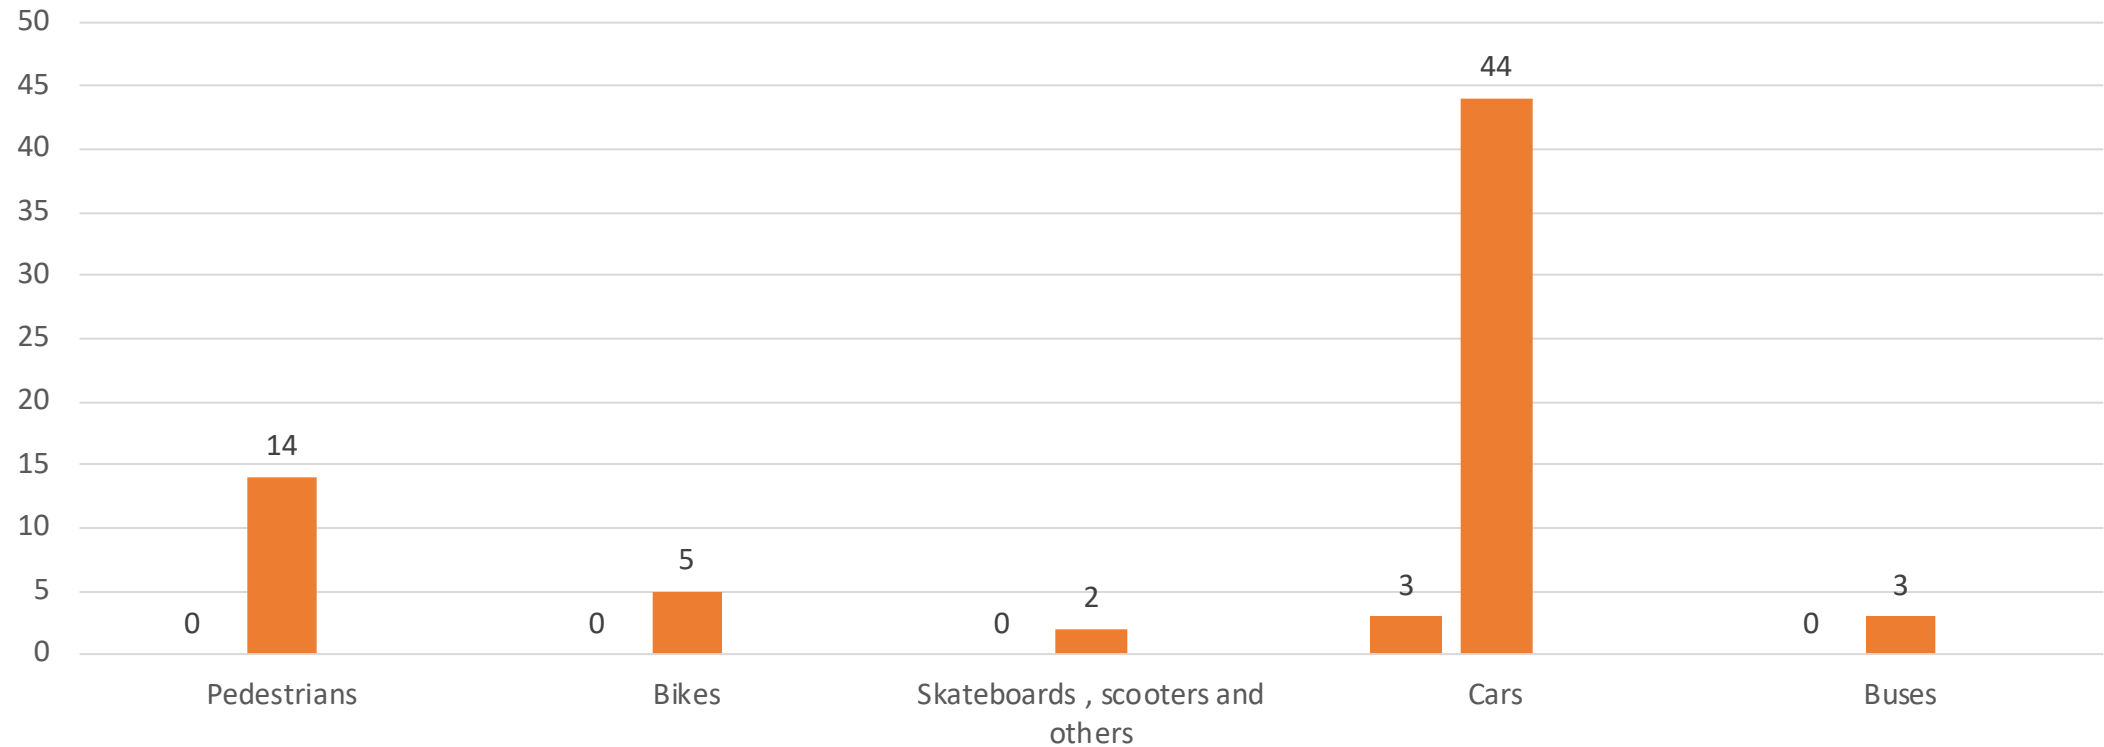

# Method

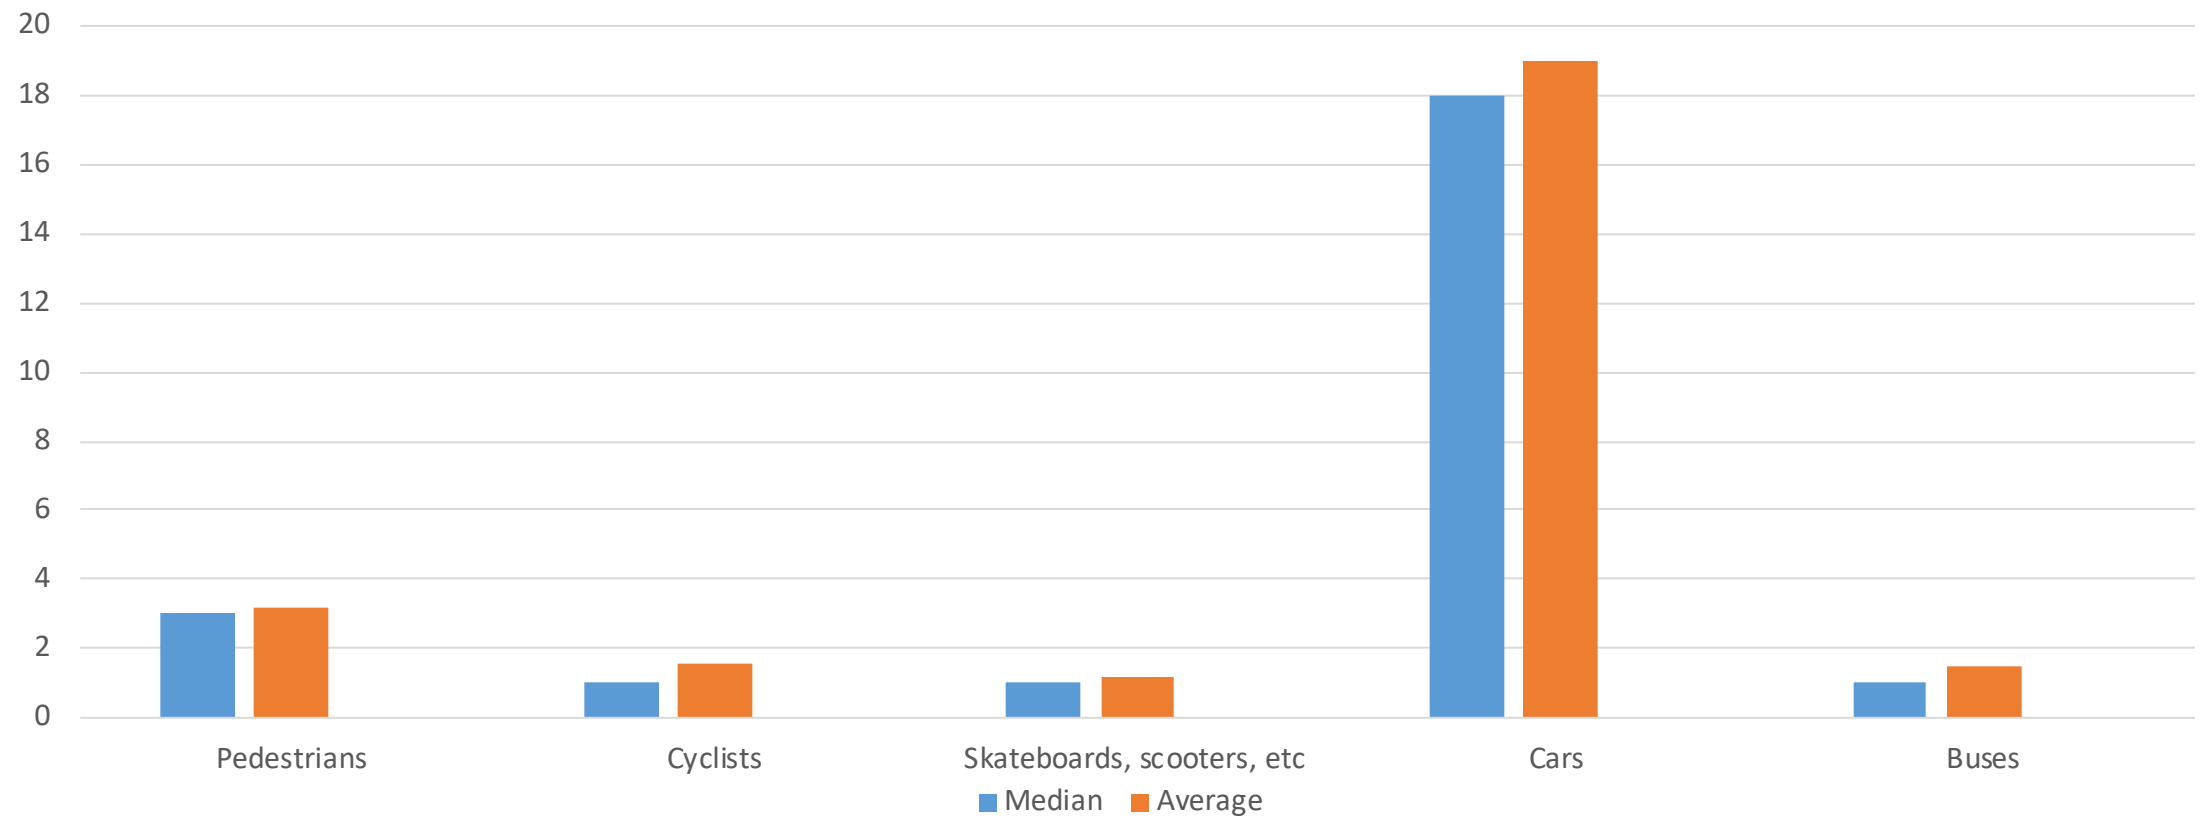

# Results: Numbers using different modes

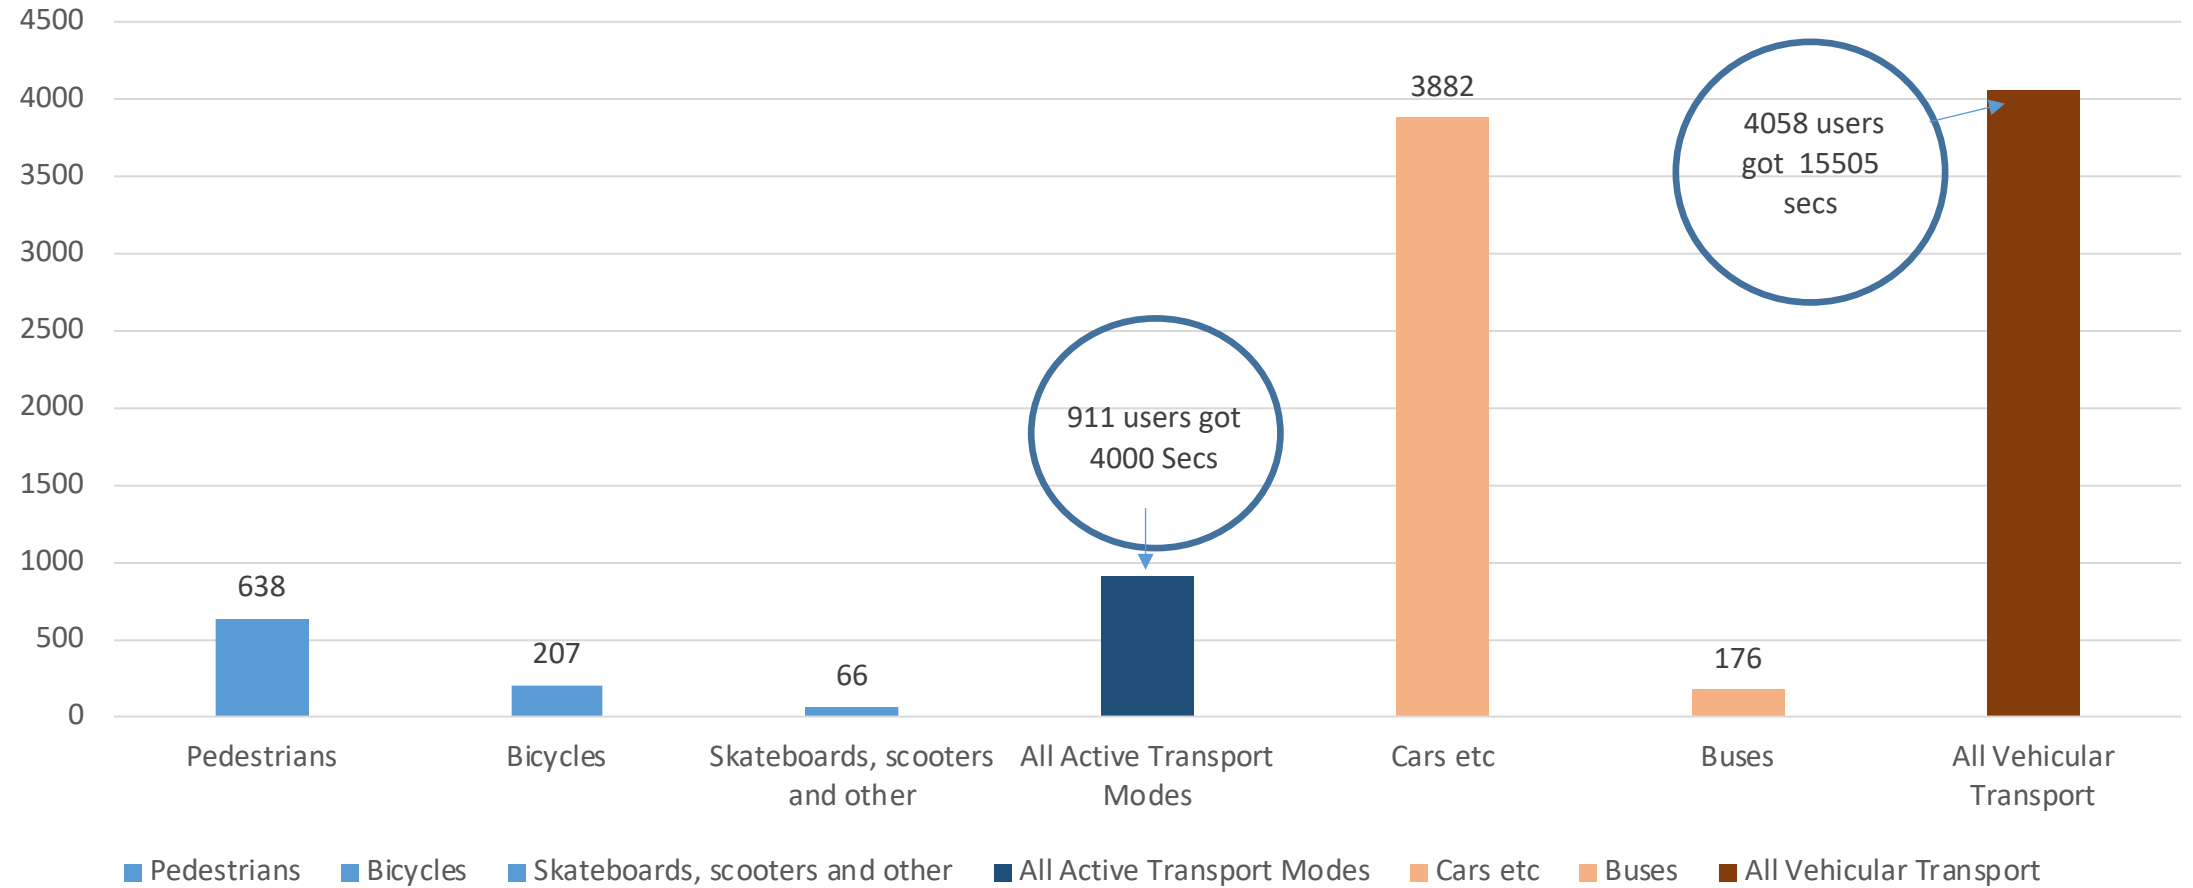

# Results: Range of different modes for one phase

# Results: Median and average for a single phase

# Results: Numbers using different modes

# Discussion

7=7=14 minutes

...or should that be just 7???

# Discussion

# Conclusion
