Constal comments and what on he done to make it better for made stricks						
General comments and what an be done to make it better for pedestrians						
1. Road work layout and space allocation						
Is it wide enough to cope with pedestrian flows?						
For wheelchairs and double buggies? Turning space?						
2. Footpath condition						
Is the footpath surface in good condition?						
Are the ramps smooth and at an acceptable gradient?						
Are tactile pavers present? Are they correctly installed?						
Is there flooding potential?						
Is there contrast when surface changes levels?						
3. Obstructions						
Do the barriers/fencing/street furniture allow free passage?						
Are there obstructions that hinder a sight-impaired road user?						
Are there temporary obstructions on the footway?						
Is there an alternative route?						
4. Crossing points and desire lines						
Are all street crossings at street level?						
Are desire lines blocked?						
5. Traffic						
Does the vehicular traffic intimidate or endanger?						
Are cyclists using the footpath?						
Is the on street parking appropriate? Does it obstruct visibility?						
6. Signage						
Are signs appropriate for the pedestrian environment?						
Are the signs clear and easy to read?						
7. Personal security: Does the site feel safe?
