#### Data

## Summary of the travel survey indicators required

|   | Key indicator   | Comments   |
|---|---|--|
| 1 | Proportion of people<br>who have made at<br>least one walking<br>stage on the survey<br>day                           | The Standard provides details of how an "average" day is<br>to be arrived at, and ways of handling data on days of the<br>week, month, and season. It specifies the minimum age of<br>people surveyed.   |
| 2 | Average number of<br>daily walking trips and<br>walking stages per<br>person  | The Standard defines "trips" and "stages" generally,<br>as well as specifically on foot, including the issue of<br>walking in public and private spaces.   |
| 3 | Average daily time<br>walked per person   | The Standard specifies how total walking time is arrived at, and the issue of "waiting time" is dealt with.  |
| 4 | Average daily distance<br>walked per person   | The Standard requires the total distance walked in publicly<br>accessible spaces to be presented. It also describes why<br>the arithmetic mean as well as the median distance need<br>to be calculated (median distance is the distance that<br>50% of the people exceed and 50% fall below) |
| 5 | Mode share of walking<br>based on:<br><b>A.</b> stages<br><b>B.</b> main mode<br><b>C.</b> time<br><b>D.</b> distance | The Standard requires walking data to be set alongside data for all other modes, and for all trip purposes to be included.   |

#### http://www.measuring-walking.org

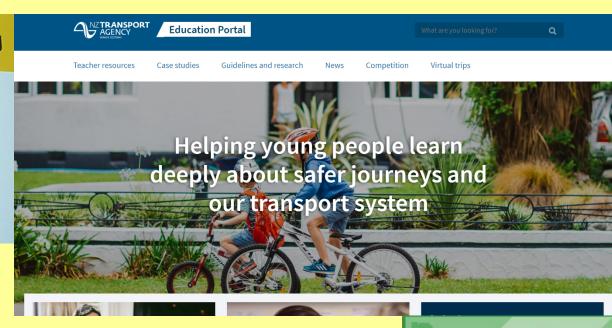

#### New Zealand's commitments

- International
  - WHO's Global Action Plan on Physical Activity
  - PARIS Climate Treaty
- Wellbeing
  - Social, Environmental, Economic, Cultural
  - Child Wellbeing
- Road Safety Vision Zero

#### Why **walking** not "Active Transport"?

- Walking gets forgotten
- More children and adolescents walk already
- Minimal equipment needed no helmets or bikes
- Some issues the same as for people on bikes (traffic speed and volume, storage of coats/jackets)
- Easier to start from inactive lifestyle
- More sociable
- Fewer barriers
- Works with Public Transport
- BikeReady and Bikes in Schools already funded

CREATE

VIRONMENTS

# Existing initiatives need tuning, boosting & connecting

- Feet First (NZTA)
- Green prescriptions
- Road Safety co-ordinators
- Travel plans
- Walking School Buses
- Healthy Physical Activity (Education, Health, Sport NZ) Budget 2019
  - school physical activity advisors.
- Increased Walking & Cycling Funding (GPS 2018)
- KidsCan (e.g. 47,000 raincoats) Variety and other charities
- Living Streets Aotearoa has examples, connections & supporting campaigns

#### Recommendations to Government

- Focus on Walking to School (W2S)
- Appoint and fund a cross-agency W2S steering group for three years
  - Ministries of Transport, Health and Education
  - Academia, HPC, LGNZ/TRAFINZ, Sport NZ and Living Streets Aotearoa
- Improve data measurement for walking to school
- Mandate national, regional and city targets
  - >50% usually walk to school by 2025
  - Zero W2S deaths or serious injuries (while increasing walking rates)
- Make school travel plans compulsory for all schools
- Fund school travel planners in Unitary, Regional and City Councils
- Fund in-school W2S coordinators (part of school physical activity advisors' role)
- Fund charities to increase shoe, coat and bag provision for kids in poverty
- Support volunteers (WSBs, Crossings)
- Prioritise safety near schools with increased Funding Assistance Rate
- Make 30kph zones for 300m minimum radius around primary schools
- Plan future school locations and zoning to make walking possible for most students
- Make the 2014 national School Safety Assessment public, use to prioritise infrastructure
- Promote Walking to School nationally including updated Feet First material
- Support Living Streets Aotearoa
  - to share local and international best practice to advocate for the rights of children, adolescents and their families to walk safely and enjoyably.

### Hikoi ki a Mātauranga / Walk to School

# To ensure more than 50% of children and adolescents walk to school by 2025.
